SECRETARY'S REPORT

November, 1990

To the Governor, Legislature, and People of South Dakota:

For the past several years, this annual report has taken a much more usable form. User friendly, the computer people call it.

Those of you who have become familiar with our report during the last few years will find the fiscal year 1990 report familiar ground. The format and the graphics have been changed only slightly - hopefully, for the better. What is new and improved is the quality and quantity of usable information. And with the interest in taxes and taxation in our State, more people are finding this report a handy tool.

We've resisted the desire to load you down with more facts than you can use, but in most cases we can respond to your request for more if you need more.

Thanks for letting us know what you need.

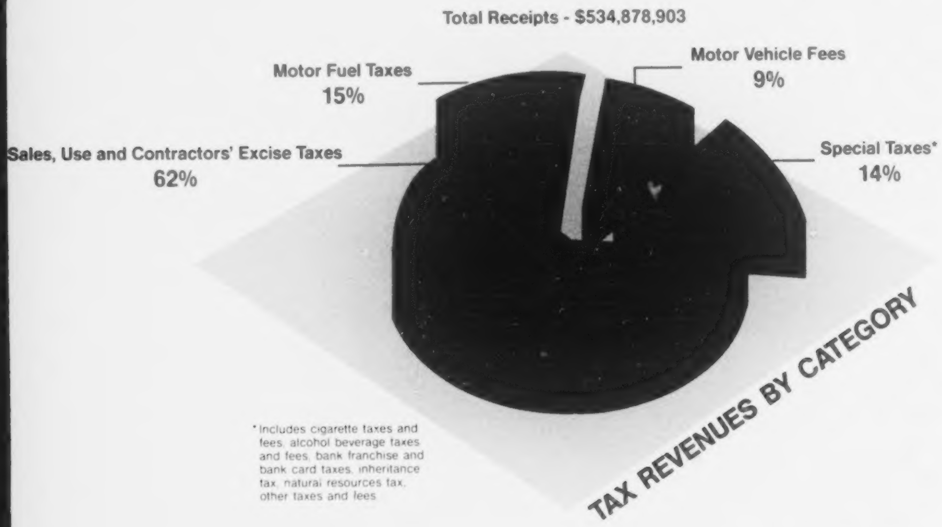
Sincerely,

Ron Schreiner
SECRETARY OF REVENUE

TAX REVENUES BY CATEGORY AND DISTRIBUTION

The South Dakota Department of Revenue is the principal agency of tax administration for the state of South Dakota. While there are 42 different state taxes collected by the department, they can be grouped into four main categories: sales, use and contractors' excise taxes, motor fuel taxes, motor vehicle licensing and special taxes. The total revenues from these taxes in fiscal year 1990 was $534,878,903. That amount compares with revenues of $496,520,598 in fiscal year 1989. A breakdown of total revenues by category of tax is shown in the chart below.

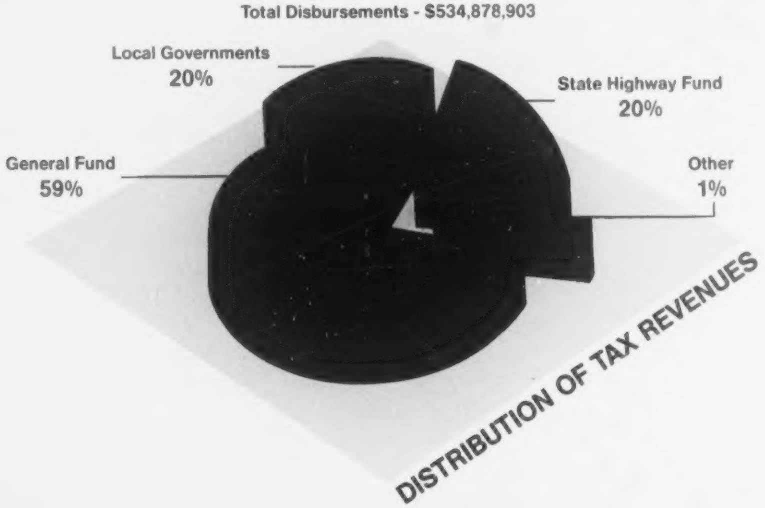
The Department of Revenue collected 62% of its revenues from sales, use and contractors' excise taxes in fiscal year 1990.



*Includes cigarette taxes and fees, alcohol beverage taxes and fees, bank franchise and bank card taxes, inheritance tax, natural resources tax, other taxes and fees

Once collected, tax revenues are distributed to three primary locations: the state's general fund, local units of government and the state highway fund. The chart below shows the percentage of the total taxes received by each group.

The state's general fund received 59% of the department's total collections.



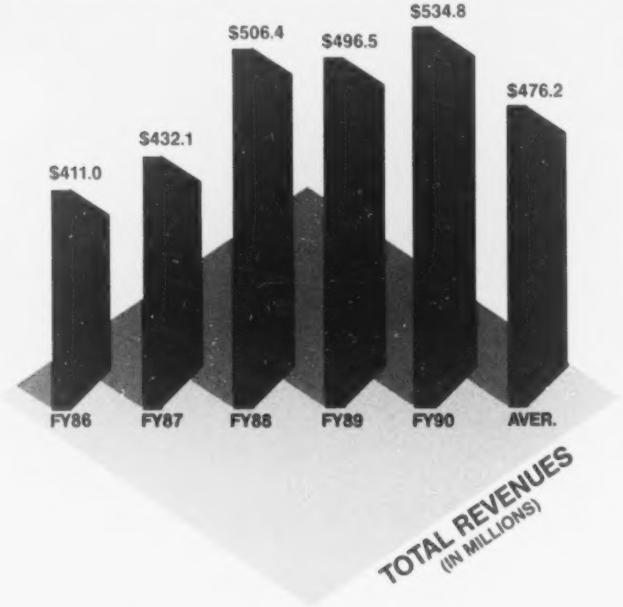
AN OVERVIEW OF TAX REVENUES

Total Revenues

Revenues collected by the department from taxes and licensing fees totaled $534,878,903 in fiscal year 1990. This amount is an increase of $38,358,305 from last year's revenues of $496,520,598. The major source of this revenue, sales, use and contractors' excise taxes, increased by $25,606,541. Revenues from fuel taxes increased by $3,825,516; motor vehicle licensing fees increased by $3,676,686; and special tax revenues increased by $5,249,562. The two charts below illustrate the change in total revenues over a five-year period.

Fiscal year 1990 revenues were $58,699,170 above the five-year average.

TOTAL REVENUES: A FIVE-YEAR COMPARISON



The percentage change in revenues from 1986 to 1990 is a plus 30%.

Total Revenues		
Fiscal Year	Total Revenue	Percent of Change
1986	$410,981,487	3.69%
1987	$432,084,741	5.13%
1988	$506,432,934	17.21%

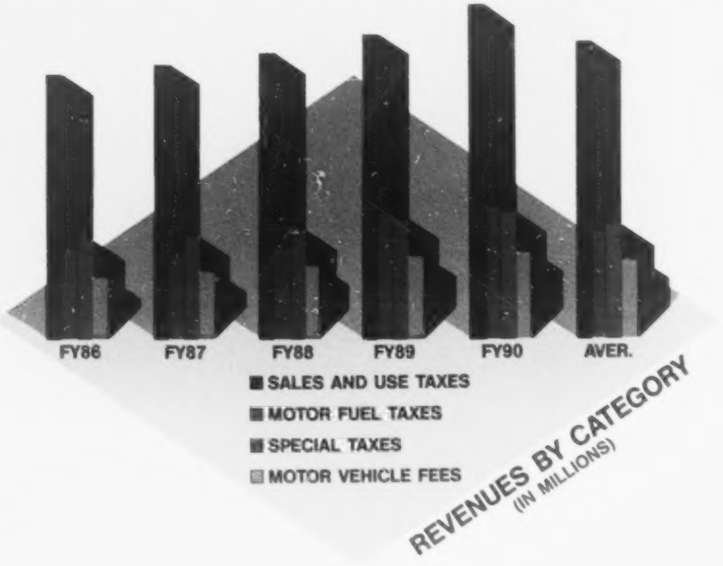
1990	$534,878,903	7.73%
Five-Year Average	$476,179,733	N/A

Revenues By Category

A five-year comparison between the revenues from the four major tax categories shows a consistency in the dollars generated by each category. Sales taxes have clearly been first, and motor vehicle fees have produced the least revenue. Special taxes have ranked second in revenues every year except 1989 and 1990.

REVENUES BY CATEGORY: A FIVE-YEAR COMPARISON



Sales, use and contractors' excise taxes make up almost 62% of the department's total revenues.

A Comparison of South Dakota's Taxes with Surrounding States

While the following chart gives a good indication of the relative rate of taxes in each state, it does not reflect all the variables. For example, while South Dakota applies its sales tax to most services, other states may not.

A Comparison of Tax Rates
(As of August 1990)

	State Sales Tax (percent)	Gasoline Tax (cts. per gallon)	Cigarette Tax (cts. per package)	Corporate Income Tax			
				Minimum Rate	Amounts Up To	Maximum Rate	Amounts Over

Iowa	4	20	31	6	25,000	12	250,000
Minnesota	6	20	38	9.5		Flat Rate	
Montana	No Tax	20	18	6.75		Flat Rate

North Dakota	5	20	30	3	3,000	10.5	50,000
Wyoming	3	10	12			No Tax	

The chart above illustrates the differences in the rate of taxes among states in the region. The chart below shows how those rates affect individual taxpayers and compares this effect with the rest of the nation. In 1985, South Dakotans paid an average of $1,043 per person in state and local taxes. This compares with $241 paid twenty years earlier. The national average in 1985 was $1,465, leaving only five other states with taxes lower than South Dakota's.

Distribution of Taxes

In fiscal year 1990, the department collected $534,878,903 in taxes. Those dollars were then distributed to various funds and units of government. The largest portion of the revenues, 59%, is deposited in the state's general fund. The chart below shows the taxes that produce the revenues and the manner in which the revenues are distributed.

The general fund receives a portion of the revenues from most taxes.

[1] *The state retains a minimum administrative fee; which varies from 1.25% to 1.8%.*

[2] *Revenue from reservation taxes is distributed to the reservation on a proratable basis based on the percentage of Indian population on the reservation and a proratable percentage is retained by the state based on the percentage of non-Indian population on the reservation. The state also retains 1% of the revenue credited to reservations as an administrative charge.*

[3] *An exception exists regarding banks organized pursuant to SDCL 51-16-40 to 51-16-44, inclusive. 95% of the revenue derived from that tax is deposited into the State General Fund and 5% to the county where the bank is located.*

[4] *Revenues from mining companies licensed after January 1, 1981, are split as follows: 80% to the state, 20% to the county of production (subject to a $1 million cap)*

[5] *If the energy development fund has a balance of less than $100,000 then one-sixth (1/6) of the revenue is deposited in that fund until the balance reaches $100,000.*

[6] *Revenue from devices located outside municipalities is deposited into the State General Fund. If the amusement device is located within the boundaries of a municipality then the revenues are remitted to the municipality.*

Revenues by Type of Tax

The department administers 42 separate taxes and fees. In fiscal year 1990, the revenue produced by these taxes varied from a low of $100 to a high of $230,017,385.

In addition, the amount of revenue generated by individual taxes fluctuated from fiscal 1988 to fiscal year 1990 by as much as 38%.

* In 1988, Sales and Use Tax Revenues include a special 1% tax for Economic Development

Total Revenues

In fiscal year 1981, South Dakota had a state railroad tax. This 1% tax was added to the state sales tax. Revenues from the tax were used to purchase railroad property.

Sales tax revenues in 1989 increased 4.4% over fiscal year 1988. The drop in total revenues is due to the repeal of the special, one-year economic development tax.

State sales tax receipts have averaged $209,045,972 over the last ten years.

Sales tax revenues have increased an average of 6% per year over the last ten years.

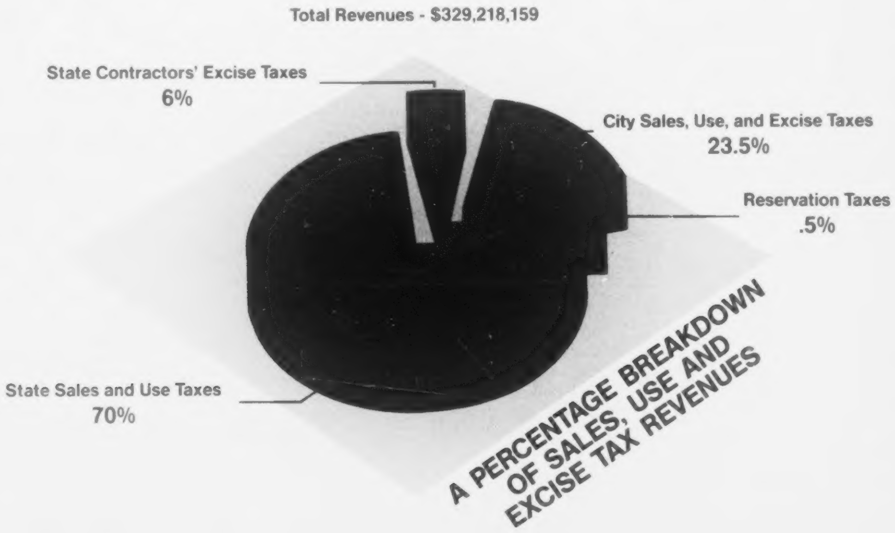
Fiscal year 1988 and 1989 figures are influenced by $40 million in revenues from the special, one-year economic development tax.

A Percentage Breakdown of Sales, Use and Contractors' Excise Tax Revenues

In fiscal year 1990, sales, use and contractors' excise taxes in South Dakota totaled $329,218,159. Within this category are four types of tax: state sales and use taxes, state contractors' excise taxes, city sales, use and contractors' excise taxes and reservation taxes. The pie chart below illustrates the percentage of the $329 million in total tax produced by each tax type.

Total sales tax revenues broken out by tax types.

City sales tax revenues increased by 13.2% in fiscal year 1990.



Municipal and Reservation Taxes

While cities and Indian reservations set their own tax rates, the administrative task of collecting municipal and reservation taxes is performed by the Department. The dollars are then redistributed to the taxing units based on the amount collected from each city or reservation.

Sales tax revenues do not necessarily indicate the level of economic activity, since municipalities and Indian reservations vary in their tax rates and the size of their tax bases.

A Comparison of South Dakota's Local Sales Taxes with Surrounding States

During fiscal year 1989, thirteen municipalities enacted local sales taxes. In fiscal year 1990, 5 more municipalities began a local sales tax, bringing the total number of local governments with sales and use taxes to 138.

The number of local governments in South Dakota using a sales tax is approximately two times higher than any other state in the region.

South Dakota has 59 more local governments using a sales tax than any other state in the region.

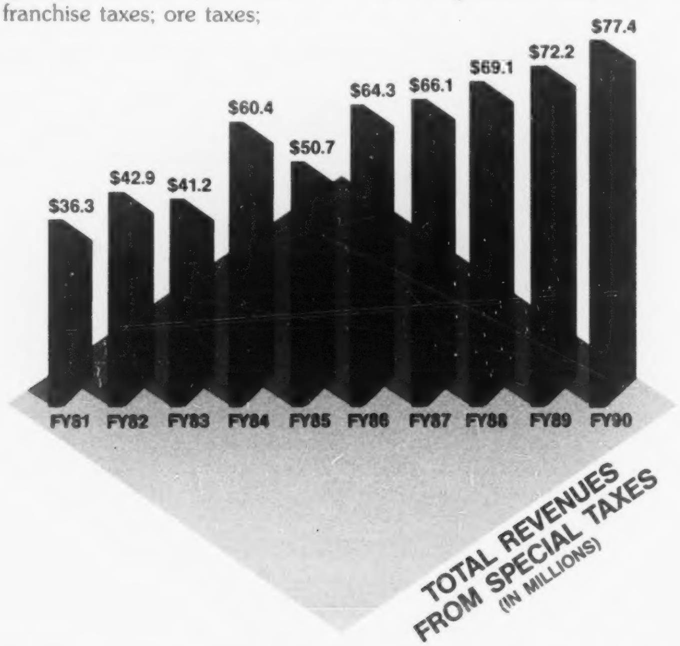
Total Revenues

The revenues collected in fiscal 1990 from the category of Special Taxes were $77,449,209. This tax category includes: cigarette excise taxes; cigarette license fees; reservation cigarette excise taxes; inheritance taxes; bank franchise taxes; ore taxes; energy mineral severance taxes; coin operated laundromat license fees; beer, wine and distilled spirits taxes; beer and liquor license fees; and alcohol beverage brand registration fees.

Special Tax revenues have increased 53% over the last ten years.



The Special Tax category can be divided into four major types: bank franchise taxes; inheritance taxes, alcohol taxes and cigarette taxes. The pie chart below illustrates the percentage of revenues produced by each type of tax.

In fiscal year 1990, bank franchise and bank card taxes generated 40% of special tax revenues.

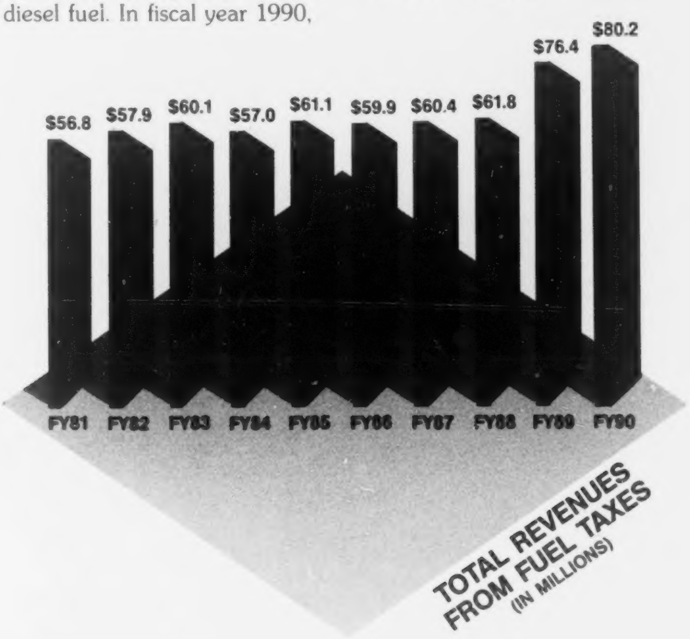
FUEL TAX AND MOTOR VEHICLE LICENSING

Total Fuel Tax Revenues

Fuel taxes include taxes on gasoline, gasohol, aviation fuel, jet fuel, liquid petroleum gas (LPG) and diesel fuel. In fiscal year 1990, there were 1,463 licensed fuel distributors in South Dakota.

Total fuel tax collections prior to refunds.



Of the three types of fuels sold in South Dakota, motor fuel (gasoline) is by far the most significant, producing 81.2% of the total fuel tax revenues in fiscal year 1990.

The chart below illustrates the percentage of the total fuel tax revenues produced by each type of fuel.

In fiscal year 1990, gasoline taxes generated 81% of the total fuel tax revenues.

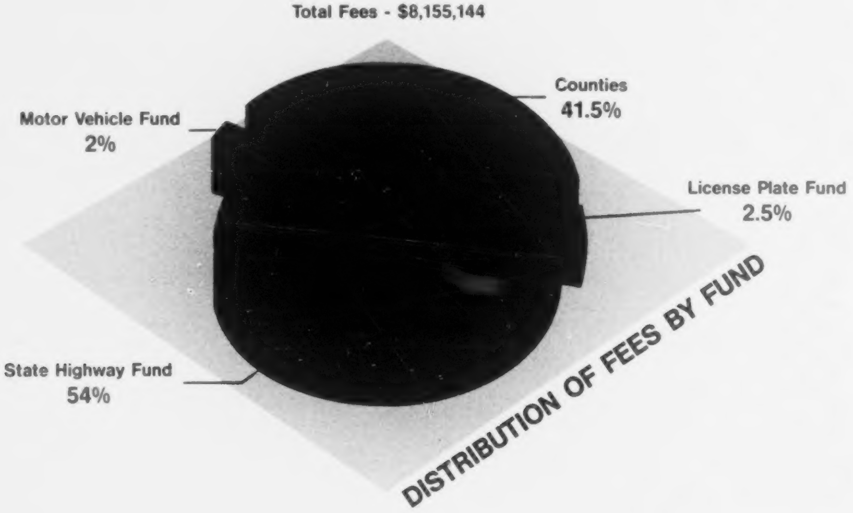
Multi-State Registration Fees

Multi-state registration fees are licensing fees levied on commercial motor carriers doing business within the state. The amount of the fee is determined by the percentage of miles the carrier travels within the state. Over 95% of the fees are used by the state and counties to maintain public roads.



Total revenues during fiscal year 1990 were $8,155,144. Of this amount, 54% was used to maintain state highways, 41.5% was used to maintain county highways, 2% went to the State Motor Vehicle Fund and 2.5% to the License Plate Special Revenue Fund.

Titles and Registrations

Any vehicle operated on South Dakota's roadways, including mobile homes, trailers and snowmobiles, must have a title verifying ownership. If used on public roadways, the vehicle must also be registered. Registration is confirmed by the issuance of a license plate.

Property taxes in South Dakota are part of a larger system of taxation that includes sales taxes, fuel taxes, motor vehicle licensing and a wide variety of special taxes. Property taxes are, however, local taxes. They are the primary source of dollars for school systems, counties, municipalities and other local government units. Consequently, their administration is a local responsibility. The authority of the Department of Revenue is limited to assisting local government units in making property tax assessments that are fair and in compliance with the law. The department does not collect or use property taxes.

How Property Taxes Are Applied

Property owners in South Dakota may be taxed by two or more of the following units of government: cities, counties, townships, school districts, water districts and, in some cases, units such as fire and sanitary sewer districts. There are, however, three steps that are common to the application of property taxes in each governmental unit.

①

Establishing the Value of Property

The first step is to establish the value of all the property within the boundaries of each unit of government. Because all property is not of equal value, individual values are arrived at based on the price the property would bring if sold. This selling price, determined by the sale price of comparable properties and known as the true and full value, is what establishes the value of the property.

②

Establishing the Amount of Tax

The second step is to determine the amount of taxes needed to meet the cost of operating a unit of government. The higher the cost of operating the city or school district, the larger the revenues required from property taxes. Revenues from property taxes, combined with other monies such as federal grants, must equal the size of the budget of the unit of government.

③

Establishing a Tax Rate

The third step, establishing a tax rate to apply to individual pieces of property, is based on steps one and two. The tax rate for all property in a local unit of government is arrived at by dividing the value of all the property into the amount of the budget that is unfunded from other sources.

This calculation results in a tax rate expressed in dollars of tax per thousand dollars of property value, or "dollars per thousand." If the dollars per thousand were $4, the tax on a home valued at $50,000 would be calculated at $4 X 50 and would result in a tax of $200.

In practice, all the tax rates that apply to a property are added together, resulting in a single tax levy. This single levy, however, is always the product of two or more tax rates assessed by different government entities as illustrated on the top of the next page.

Local Units of Government Taxing A Hypothetical Parcel of Property

Property "X" taxed at a rate of $45.37 per thousand dollars of taxable value.

Unit of Government	Amount of Tax
School District Tax	$17.88 per thousand
County Tax	10.09 per thousand
City Tax	16.75 per thousand
Township Tax	0 per thousand
Water District Tax	0.25 per thousand
Fire District Tax	0.30 per thousand
Sanitary District Tax	0.10 per thousand
TOTAL	45.37 per thousand

Property Tax Variables

Three major variables affect the taxes on individual pieces of property:

1. the size of the combined budgets of the governmental units taxing the property;
2. the value of all the property in the governmental unit;
3. the value of the individual piece of property.

A change in any one of these three variables will change a property owner's taxes. For example:

if budgets decrease even though the value of all the property in a taxing jurisdiction as well as the value of an individual piece of property remain the same, the tax on the individual piece of property will decrease;

if budgets and the value of an individual piece of property remain the same while the value of the property in the rest of a taxing jurisdiction decreases (due to a drop in land prices, for example), the tax on the individual piece of property will increase;

if budgets and the value of property in a taxing jurisdiction remain the same while the value of an individual piece of property increases (due to a new addition on a home, for example), the tax on that individual piece of property will increase.

The chart below illustrates the effect of changes made in property tax variables.

Even after the tax rate is established, the rate cannot be applied uniformly to all property because school districts tax agricultural property at a lower rate than nonagricultural property.

The Effect of Changes in Property Tax Variables On A Parcel of Property

If local government budgets **decrease**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **remains the same**	**TAXES DECREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **decreases**	AND	The value of the individual's parcel of property **remains the same**	**TAXES INCREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **increases**	**TAXES INCREASE**

Limits on Property Taxes

Although budgets control the size of a political subdivision's taxes, there are limits on the amount of taxes that can be levied. First, tax rates may not be based on more than 60% of the value of a piece of property. This limit means that if a piece of property is valued at $100,000, only $60,000 of that amount is subject to property tax.

The second limit is on the rate per thousand dollars of value. Each unit of local government is limited in the dollars per thousand it may tax. For example, the maximum rate for cities is $45 per thousand, while the maximum rate for townships is $5 per thousand dollars of property value.

Total Property Taxes

Taxes levied on property in South Dakota increased 1.1% from 1989 to 1990. Taxes on agricultural property decreased 1.0%, while nonagricultural property taxes increased 1.4%.

PROPERTY TAXES/CONTINUED

The following chart compares the 1989 effective tax rate in 27 of South Dakota's largest cities (nonagricultural property) and townships (agricultural property). The effective tax rate is the percentage of a property's sale price that will be paid in taxes. For example, if the effective tax rate is 2% the taxes on a home selling for $40,000 would be $800 per year. The information below is based on a parcel of property with a $40,000 selling price and is calculated for nonagricultural commercial and residential property and agricultural property.

In 1990, Watertown had the lowest residential effective tax rate among the state's 27 largest towns.

Replacement of the Personal Property Tax

In 1979 personal property taxes were eliminated in South Dakota. Since then, the legislature has appropriated $40.7 million each year in general fund monies to replace personal property tax revenues lost to counties. The 1988 legislature appropriated an additional $2.91 million for a total of $43.654.104. The 1989 legislature appropriated this same amount, but changed the method of distribution. The Department of Education distributes the schools' portion directly to the schools. The Department of Revenue distributes to the counties the portion for counties, cities, and townships. This distribution is shown below.

Sales To Assessment Ratio Analysis

One factor in the amount of tax levied on a parcel of property is the value assigned to the property. If, for example, the rate of tax is $4 per thousand dollars of value and the value of the property is determined to be $30,000, the tax will be $120. On the other hand, if the property is valued at $40,000, the tax will be $160.

The accuracy of assessments can be evaluated by comparing them with the actual sale prices of property. The Sales to Assessment Ratio Analysis in the following chart compares, by county, the assessed value of property with its real value, i.e., sale price. The ratio is expressed as a percentage and is found by dividing the assessed value by the selling price. Thus, a parcel assessed at a value of $32,000 and selling at $40,000 would have an assessment/sales ratio of 80%.

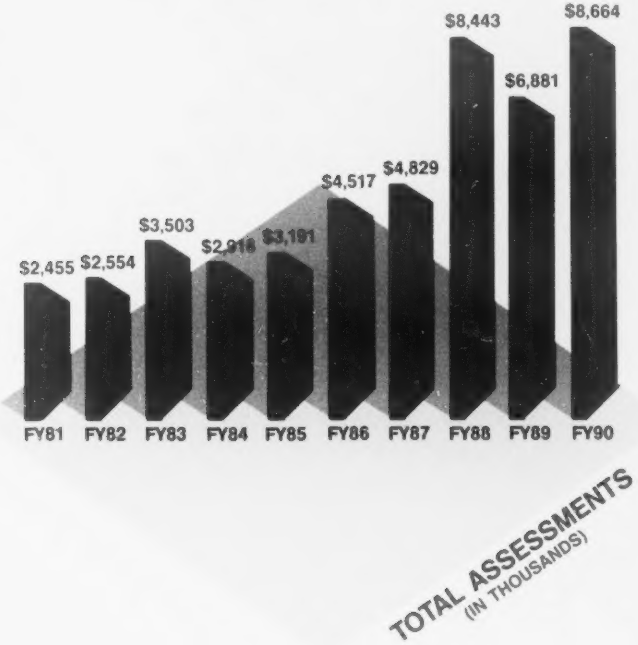
AUDITS

To insure that businesses are correctly reporting their taxes, the Department of Revenue performs regular audits on financial records. Audits may be carried out on any tax-paying license holder, in-state or out-of-state, large or small.

Audits result in the correction of errors made by businesses in the payment of taxes. These corrections meant an additional $8,664,172 in tax revenues (assessments and penalties) in fiscal year 1990.



Assessments have increased 72% over the total assessments in FY80.

Refunds to the Elderly and Disabled

Tax refunds are an essential part of South Dakota's tax system. They apply to two groups: the elderly and disabled who are eligible for sales and property tax refunds and consumers using vehicles and equipment off of highways and roads who may receive motor fuel tax refunds.

Sales and property tax refunds made to low-income senior or disabled citizens increased 79% in 1990.

As the chart below illustrates, refunds declined from 1981 to 1988. In 1990, however, the legislature relaxed eligibility requirements and refunds increased by 79%.

The number of refund applications by group in 1990 were:

Disabled single 843

Refunds by County

Tax refund dollars for the elderly and disabled affected citizens in every county. Minnehaha County had the largest number of participants with 718, followed by Pennington County with 429 and Brown County with 284.

The top five counties in the dollar amount of refunds were Minnehaha, Pennington, Brown, Codington and Davison counties.

This list includes both property and sales tax refunds.

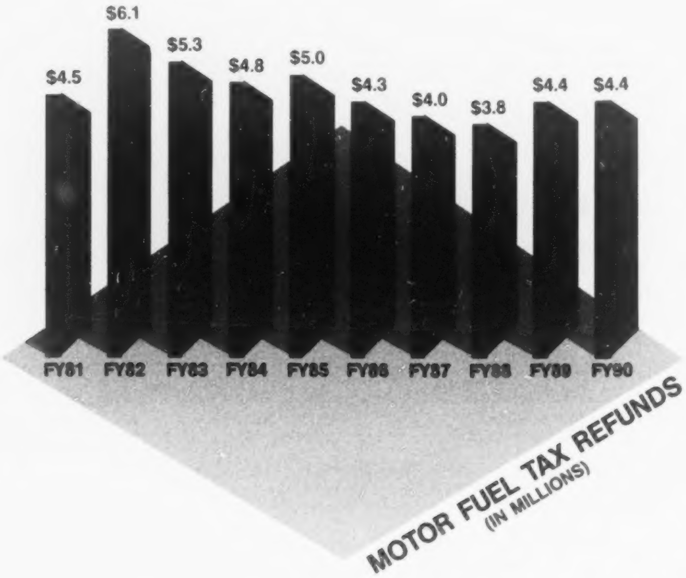
Motor Fuel Tax Refunds

Motor fuel used to operate agricultural and commercial equipment, other than aircraft, off of roads and highways is not subject to a fuel tax. Consumers documenting this off-highway usage are given a motor fuel tax refund. During fiscal year 1990, there were 14,945 refunds totaling $4,476,946. The average refund amounted to $300 in fiscal year 1990 as compared to $277 in 1989.



Motor fuel tax refunds peaked at $6.1 million in fiscal year 1982.

The administration of the 42 tax laws in force in fiscal year 1990 and the collection and distribution of the $534 million of tax revenues required 169 full-time employees. The total administrative costs were $10 million, of which $3 million were general fund dollars.

The Department of Revenue is organized into five divisions and the Office of the Secretary. While the department secretary, division directors and support staff are in Pierre, divisional field offices are located in six communities throughout the state.

SECRETARY'S REPORT

November, 1990

To the Governor, Legislature, and People of South Dakota:

For the past several years, this annual report has taken a much more usable form. User friendly, the computer people call it.

Those of you who have become familiar with our report during the last few years will find the fiscal year 1990 report familiar ground. The format and the graphics have been changed only slightly - hopefully, for the better. What is new and improved is the quality and quantity of usable information. And with the interest in taxes and taxation in our State, more people are finding this report a handy tool.

We've resisted the desire to load you down with more facts than you can use, but in most cases we can respond to your request for more if you need more.

Thanks for letting us know what you need.

Sincerely,

Ron

Ron Schreiner
SECRETARY OF REVENUE

INTRODUCTION

Property taxes in South Dakota are part of a larger system of taxation that includes sales taxes, fuel taxes, motor vehicle licensing and a wide variety of special taxes. Property taxes are, however, local taxes. They are the primary source of dollars for school systems, counties, municipalities and other local government units. Consequently, their administration is a local responsibility. The authority of the Department of Revenue is limited to assisting local government units in making property tax assessments that are fair and in compliance with the law. The department does not collect or use property taxes.

How Property Taxes Are Applied

Property owners in South Dakota may be taxed by two or more of the following units of government: cities, counties, townships, school districts, water districts and, in some cases, units such as fire and sanitary sewer districts. There are, however, three steps that are common to the application of property taxes in each governmental unit.

①

Establishing the Value of Property

The first step is to establish the value of all the property within the boundaries of each unit of government. Because all property is not of equal value, individual values are arrived at based on the price the property would bring if sold. This selling price, determined by the sale price of comparable properties and known as the true and full value, is what establishes the value of the property.

②

Establishing the Amount of Tax

The second step is to determine the amount of taxes needed to meet the cost of operating a unit of government. The higher the cost of operating the city or school district, the larger the revenues required from property taxes. Revenues from property taxes, combined with other monies such as federal grants, must equal the size of the budget of the unit of government.

③

Establishing a Tax Rate

The third step, establishing a tax rate to apply to individual pieces of property, is based on steps one and two. The tax rate for all property in a local unit of government is arrived at by dividing the value of all the property into the amount of the budget that is unfunded from other sources.

This calculation results in a tax rate expressed in dollars of tax per thousand dollars of property value, or "dollars per thousand." If the dollars per thousand were $4, the tax on a home valued at $50,000 would be calculated at $4 X 50 and would result in a tax of $200.

In practice, all the tax rates that apply to a property are added together, resulting in a single tax levy. This single levy, however, is always the product of two or more tax rates assessed by different government entities as illustrated on the top of the next page.

Local Units of Government Taxing A Hypothetical Parcel of Property

Property "X" taxed at a rate of $45.37 per thousand dollars of taxable value.

Unit of Government	Amount of Tax
School District Tax	$17.88 per thousand
County Tax	10.09 per thousand
City Tax	16.75 per thousand
Township Tax	0 per thousand
Water District Tax	0.25 per thousand
Fire District Tax	0.30 per thousand
Sanitary District Tax	0.10 per thousand
TOTAL	45.37 per thousand

Property Tax Variables

Three major variables affect the taxes on individual pieces of property:

1. the size of the combined budgets of the governmental units taxing the property;
2. the value of all the property in the governmental unit;
3. the value of the individual piece of property.

A change in any one of these three variables will change a property owner's taxes. For example:

if budgets decrease even though the value of all the property in a taxing jurisdiction as well as the value of an individual piece of property remain the same, the tax on the individual piece of property will decrease;

if budgets and the value of an individual piece of property remain the same while the value of the property in the rest of a taxing jurisdiction decreases (due to a drop in land prices, for example), the tax on the individual piece of property will increase;

if budgets and the value of property in a taxing jurisdiction remain the same while the value of an individual piece of property increases (due to a new addition on a home, for example), the tax on that individual piece of property will increase.

The chart below illustrates the effect of changes made in property tax variables.

Even after the tax rate is established, the rate cannot be applied uniformly to all property because school districts tax agricultural property at a lower rate than nonagricultural property.

The Effect of Changes in Property Tax Variables On A Parcel of Property

If local government budgets **decrease**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **remains the same**	**TAXES DECREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **decreases**	AND	The value of the individual's parcel of property **remains the same**	**TAXES INCREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **increases**	**TAXES INCREASE**

Limits on Property Taxes

Although budgets control the size of a political subdivision's taxes, there are limits on the amount of taxes that can be levied. First, tax rates may not be based on more than 60% of the value of a piece of property. This limit means that if a piece of property is valued at $100,000, only $60,000 of that amount is subject to property tax.

The second limit is on the rate per thousand dollars of value. Each unit of local government is limited in the dollars per thousand it may tax. For example, the maximum rate for cities is $45 per thousand, while the maximum rate for townships is $5 per thousand dollars of property value.

Total Property Taxes

Taxes levied on property in South Dakota increased 1.1% from 1989 to 1990. Taxes on agricultural property decreased 1.0%, while nonagricultural property taxes increased 1.4%.

Taxes Levied By Local Units of Government

Each governmental unit levies its own property taxes to meet its budget. The following chart compares the total amount of tax levied by each unit of government.

Taxes Levied By Local Units of Government – 1990

The following chart compares the 1989 effective tax rate in 27 of South Dakota's largest cities (nonagricultural property) and townships (agricultural property). The effective tax rate is the percentage of a property's sale price that will be paid in taxes. For example, if the effective tax rate is 2% the taxes on a home selling for $40,000 would be $800 per year. The information below is based on a parcel of property with a $40,000 selling price and is calculated for nonagricultural commercial and residential property and agricultural property.

In 1990, Watertown had the lowest residential effective tax rate among the state's 27 largest towns.

Replacement of the Personal Property Tax

In 1979 personal property taxes were eliminated in South Dakota. Since then, the legislature has appropriated $40.7 million each year in general fund monies to replace personal property tax revenues lost to counties. The 1988 legislature appropriated an additional $2.91 million for a total of $43,654,104. The 1989 legislature appropriated this same amount, but changed the method of distribution. The Department of Education distributes the schools' portion directly to the schools. The Department of Revenue distributes to the counties the portion for counties, cities, and townships. This distribution is shown below.

Sales To Assessment Ratio Analysis

One factor in the amount of tax levied on a parcel of property is the value assigned to the property. If, for example, the rate of tax is $4 per thousand dollars of value and the value of the property is determined to be $30,000, the tax will be $120. On the other hand, if the property is valued at $40,000, the tax will be $160.

The accuracy of assessments can be evaluated by comparing them with the actual sale prices of property. The Sales to Assessment Ratio Analysis in the following chart compares, by county, the assessed value of property with its real value, i.e., sale price. The ratio is expressed as a percentage and is found by dividing the assessed value by the selling price. Thus, a parcel assessed at a value of $32,000 and selling at $40,000 would have an assessment/sales ratio of 80%.

LAND STATISTICS

South Dakota ranks 16th among the fifty states in total area. South Dakota has a total surface area of 77,116 square miles (49,354,248 acres). The total surface area of the state is composed of 75,952 square miles (48,609,280 acres) of land and 1,164 square miles (744,960 acres) of inland water.[1]

There are several units of government as well as private concerns that own the land within South Dakota. Statistics are presented as to federal and state ownership of lands in South Dakota. Statistics as to county, township, and municipal ownership of lands in the state are not readily available, and, therefore, cannot be presented. Private ownership of lands in the state is presented in two categories: Indian and non-Indian.

STEPS IN THE DETERMINATION OF PROPERTY TAXES

The following is a brief step by step synopsis of the way in which property taxes (with the exception of centrally assessed properties) in South Dakota are determined.

Step #1

The full and true (assessed) value of all property in the state is determined by assessment on January 1.

Step #2

The various taxing jurisdictions (county, school district, city, etc.) within the county submit their budgets to the county auditor. This is generally in October.

Step #3

Tax levies (within statutory limits) for each taxing jurisdiction are determined by dividing the tax levy request by the taxable value within the taxing jurisdiction and multiplying the result by 1,000. For example, if the full and true value of all property wihin a city is $10,000,000 and the city has a tax levy request of $100,000, the tax levy is computed as follows:

tax levy =(tax levy requested divided by assessed value) x 1,000
tax levy =(100,000 divided by $4,000,000) x 1,000 =10.00 dollars per thousand

Step #4

Taxes are computed by multiplying the full and true value times the taxable percent times the tax levy. For example, if a person has property with a full and true value of $30,000 his city taxes would be computed as follows:

taxes =assessed value x (tax levy divided by 1,000)
taxes =$30,000 x 10/1,000 =$300

Taxes are due on January 1 of the year following the assessment. One-half of the taxes must be paid by May 1 of the year following the assessment and the remaining half must be paid by November 1 of the year following the assessment. All property taxes are paid to the county treasurer.

EXPLANATORY NOTES

PROPERTY TAXES COLLECTED FROM ALL SOURCES: Upon receipt of property taxes, the county distributes the money back to the different taxing entities. The taxing entity and the amount of tax distributed depend on the property for which taxes were collected. The table shows total amount that was to be collected for each type of taxing district, the amount and the percent that was collected.

AMOUNT OF ASSESSED VALUATION, LEVIES AND TAXES FOR MUNICIPALITIES: All incorporated municipalities within the state are listed. The assessed valuation and the levies applied to that valuation are listed and used to determine total amount of property taxes within the municipality. The column **ADJUSTED VALUE** is the value for school purposes. In these cases, all levies are applied against the **ASSESSED VALUE,** except the school levy, which is applied against the adjusted value.

VALUATIONS: Each county is listed showing total full and true (assessed) valuation of real property and the taxable valuation of utility companies.

COUNTY WARRANTS AND ENCUMBRANCES: Expenditures for specified purposes and total county expenditures.

TOWNSHIPS: This valuation and tax is of all organized townships in the state, listed by county. (There are eight counties that do not have organized townships.)

TWENTY-SEVEN LARGEST CITIES: A comparison of the effective tax rate of the twenty-seven largest cities in the state. The effective tax rate is the percent of the selling price which a person would pay for property taxes.

PERSONAL PROPERTY TAX REPLACEMENT: Each county and the amount the entire county receives for the fiscal year are listed. This money, when received by the county is distributed to county, city, school and other funds.

ABSTRACT CLASSES AND TAXES: County full and true (assessed) valuations are shown, broken down by abstract class. Tax levy and taxes are shown for each taxing entity within the county.

1989 RECAP INFORMATION - TAXES PAYABLE 1990:

COUNTY: This levy and tax is the total amount for **county** purposes only.

SECONDARY ROAD: This is applicable to unorganized townships only.

SUBDISTRICTS OF SOUTH DAKOTA CONSERVANCY DISTRICTS: This is a special tax levied and used by the Subdistrict Conservancy Districts only. (Not all counties or part of counties participate.)

TELEPHONE OUTSIDE CORPORATE LIMITS: This carries a special levy and the tax collected goes into the County General Fund. This is a tax paid by telephone companies.

SPECIAL ASSESSMENTS: Includes assessments such as sidewalks, curb and gutter, weed mowing, etc.

CITIES AND TOWNS: This levy and tax is the total amount for **city** purposes only.

SCHOOLS: Apply the ag levy against the ag valuation and the non-ag levy against the non-ag valuation. These levies include General Fund plus Capital Outlay and Special Education if a levy has been made for these. Due to differences in Adjustment and Bond levies for overlapping school districts, these have not always been included in the stated levies. (If the levy for bond is uniform over the whole school district, then it has been included.) **Taxes** are the total for both ag and non-ag amounts and also include taxes for any district with a Bond or Adjustment levy.

*Designates an overlapping school district and taxable valuation may have been adjusted for school purposes only.

MOBILE HOMES: This valuation and tax is not included in the above explanations, but the tax is apportioned as other taxes and considered as Other revenue when setting up the budget.

To determine a total tax levy for any given district, you will need to add the levy for schools (ag or non-ag), city, county and any special levy that might apply to that district. In most instances, there will be an ag and non-ag levy.
